Montage Handleiding

A (mm)	B (mm)
2530	1295
	1910
	2530
	3150
	3770

Deze handleiding is onderverdeeld in secties: **B-fundering, onderdelen, 1-zijkanten, 2-voorkant, 3-achterkant, 4-de 4 wanden samenvoegen, 5-het dak, 6-ventilatie, 7-deur, 8-het glas (8a veiligheidsglas), 9-ventilatie bevestiging 10-deur bevestiging, 11 verankerings, achterkant-paklijst.**

Veiligheidswaarschuwingen

- Glas en aluminium kunnen mogelijk letsel veroorzaken. Draag een beschermende bril, handschoenen, hoofdbescherming en geschikte schoenen tijdens het in elkaar zetten van de tuinkas.
- Houdt er rekening mee dat glas kwetsbaar is en behandel het altijd met de uiterste zorg. Gooi het meteen weg bij eventuele breuken.
- Monteer de kas niet bij sterke wind.
- Voor veiligheidsredenen en gemak, raden wij aan deze kas met minimaal twee personen te monteren.
- Verwijder altijd alle sneeuw van uw tuinkas aangezien het dak anders kan doorbuigen of instorten.

Voorbereiding van de plek waar de tuinkas wordt geplaatst.

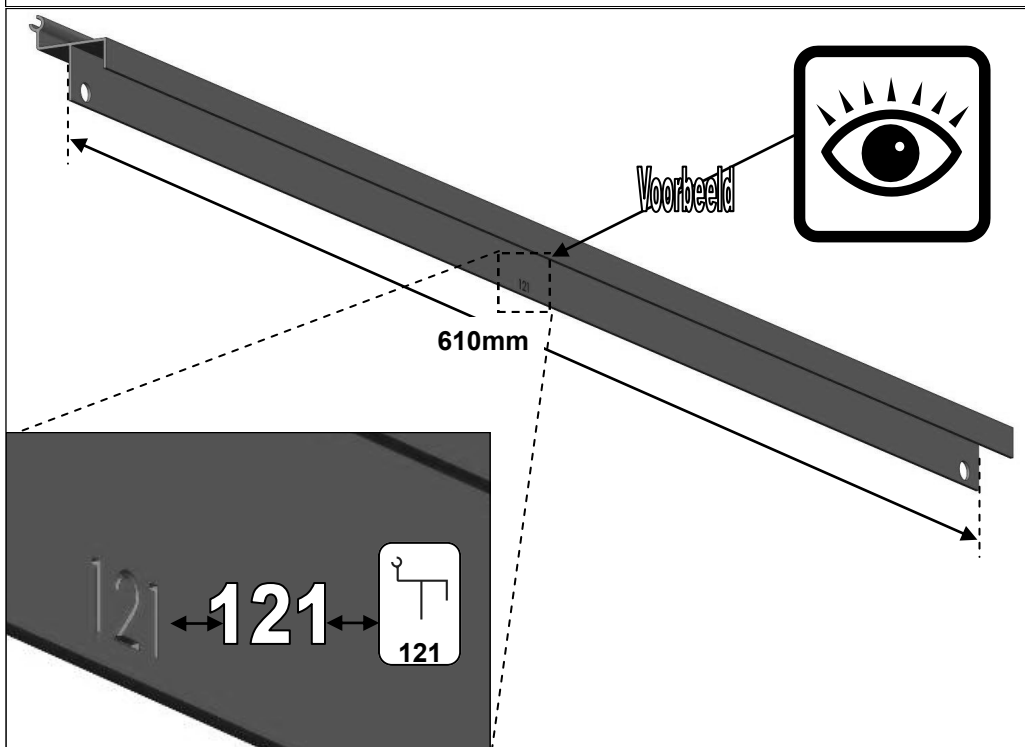

- Het is van groot belang dat de tuinkas op een oppervlak wordt geplaatst die zo vlak en recht mogelijk is.
- Een betonnen basis of een basis op betonnen platen is de meest solide fundering voor uw tuinkas.
- BELANGRIJK:** Zet uw kas **nooit** vast totdat de kas volledig is geassembleerd, inclusief het glas.
- Zet uw kas niet onder bomen of op een andere kwetsbare plek.
- Zet de kas op een zo veel mogelijke beschutte plek om het risico van windschade te beperken, bv. naast een heg of een hek.

Aanvullende overwegingen

- Houdt er rekening mee dat het in elkaar zetten van de kas tijd kost. Het is mogelijk dat de montage meer dan 2 dagen in beslag neemt. We raden aan de kas niet met gedeeltelijke beglazing achter te laten. Als u uw kas half gemonteerd en/of niet vastgezet achter moet laten dan raden wij aan om de kas te verzwaren met betonnen platen of zakken zand om te voorkomen dat de wind er vat op krijgt.
- Het is handig om een groot, schoon en leeg oppervlak te prepareren om op te werken. Een garagevloer of grasveldje zijn bijvoorbeeld heel geschikt.
- Als iemand anders voor u de tuinkas in elkaar zet, raden wij aan om te controleren of alle onderdelen aanwezig zijn. De meeste onderdelen zijn genummerd en kunnen worden herkend aan een stempel of label. Ook kunnen de onderdelen worden geïdentificeerd aan de lengtes zoals gespecificeerd in de paklijst.
- Het verankeren van de tuinkas moet de laatste stap zijn in de montage (inclusief het glas).
- Eenmaal geïnstalleerd vergt uw tuinkas weinig onderhoud. Om de deuren soepel te laten glijden kan af en toe WD40 of een soortgelijke vloeistof worden aangebracht op de deurwielen.

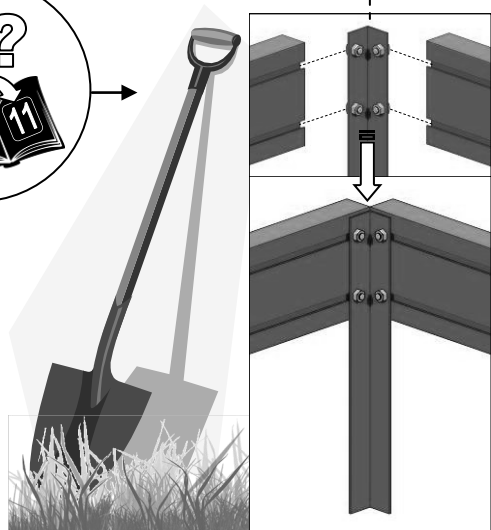

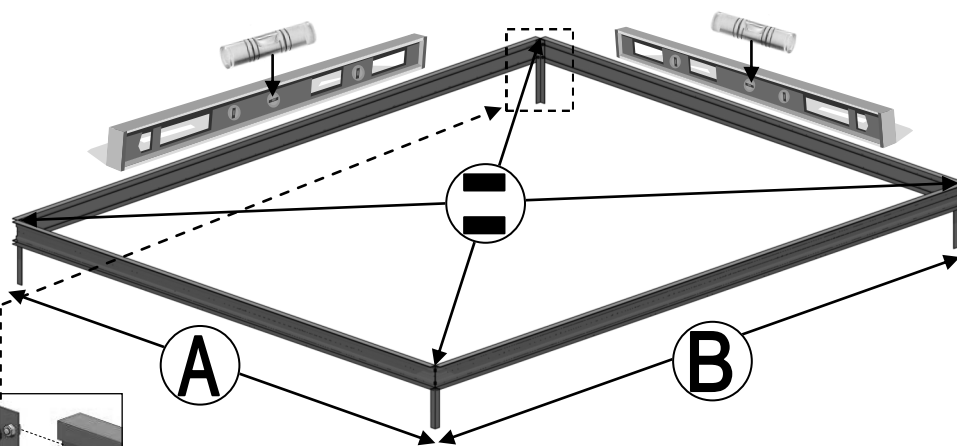

Garantie

- Uw Ecoplus tuinkas heeft een garantie van 10 jaar op productiefouten in het frame. Onder de garantie vallen niet het glas, de bewegende delen, schade door een ongeval of windschade.

Let op dat u misschien de richting van de diagonale balk beugels in de deur moet aanpassen om uw deurpost makkelijker te laten passen. De diagonalen kunnen in beide richtingen erop worden gezet.

OPTIONEEL

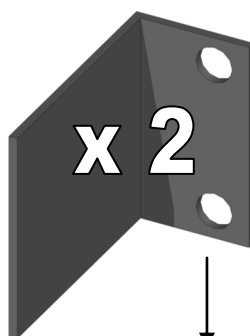

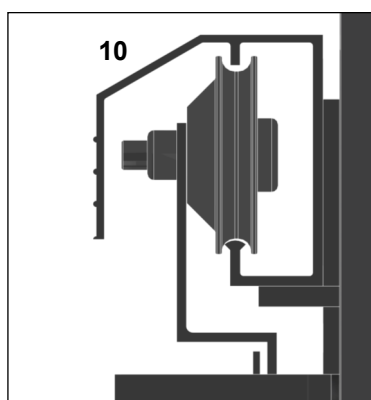

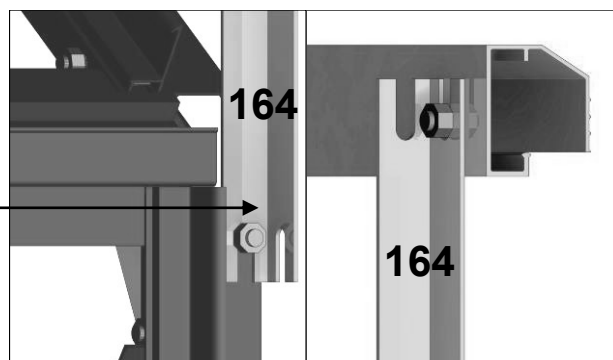

9

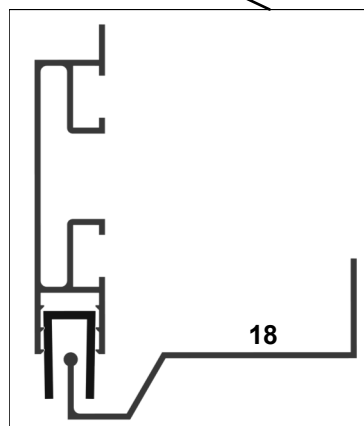

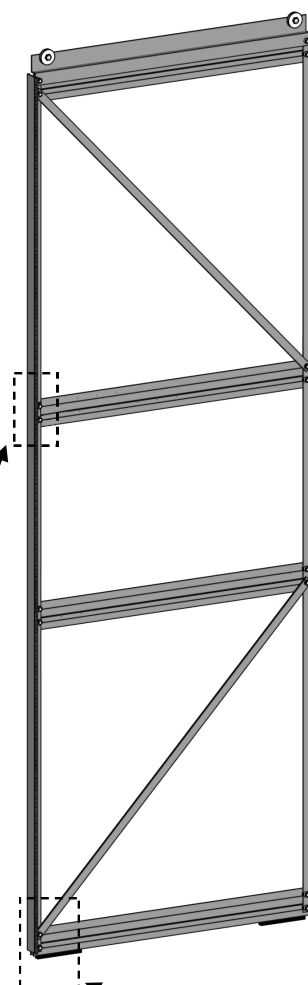

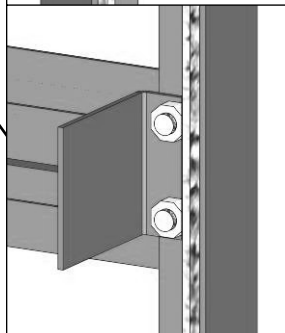

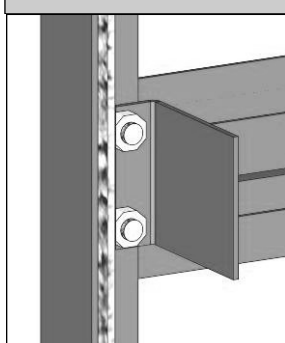

Bevestig het bovenste deur spoor '10' met de twee overgebleven bouten uit sectie 2 met moeren (zet 10 verticaal en duw hem door de centrale Sectie tussen de twee glazen balken. Draai 10, zodat de gaten in de montage-balk naar boven zijn gericht). Schuif de deuren in het bovenste spoor (10) en het onderste spoor (18), pas de hoogte van 10 aan tot de deur soepel loopt en genoeg ruimte laat voor de ruit er boven.

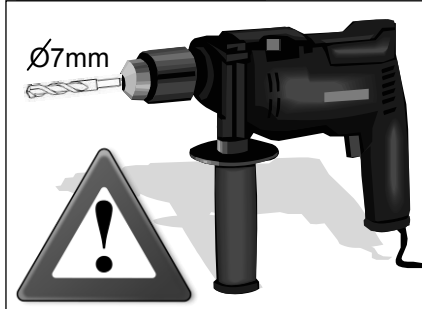

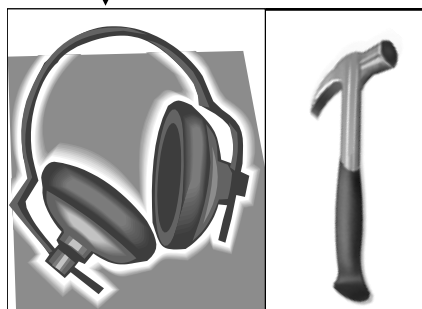

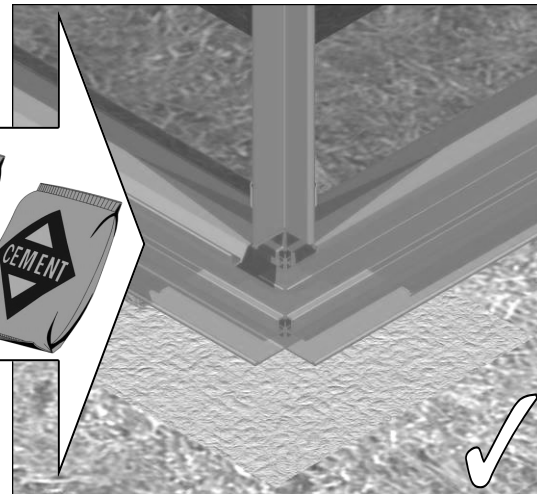

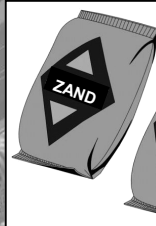

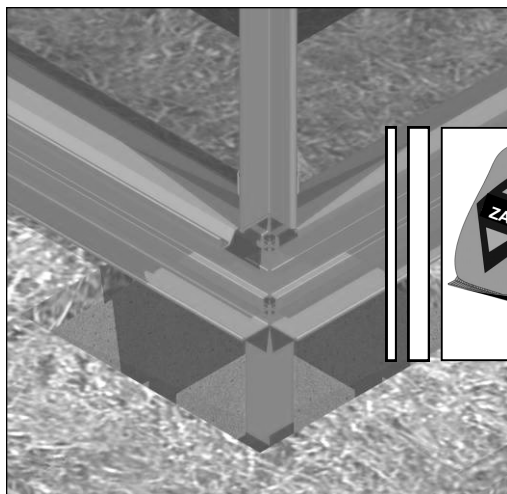

10		2530	1
164		479	2

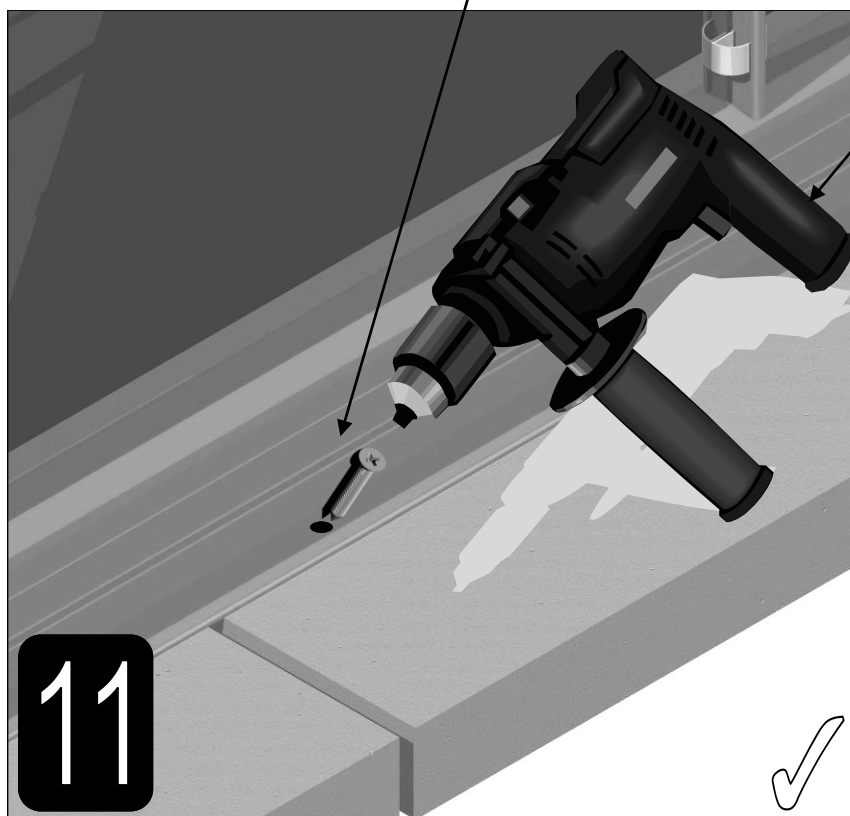

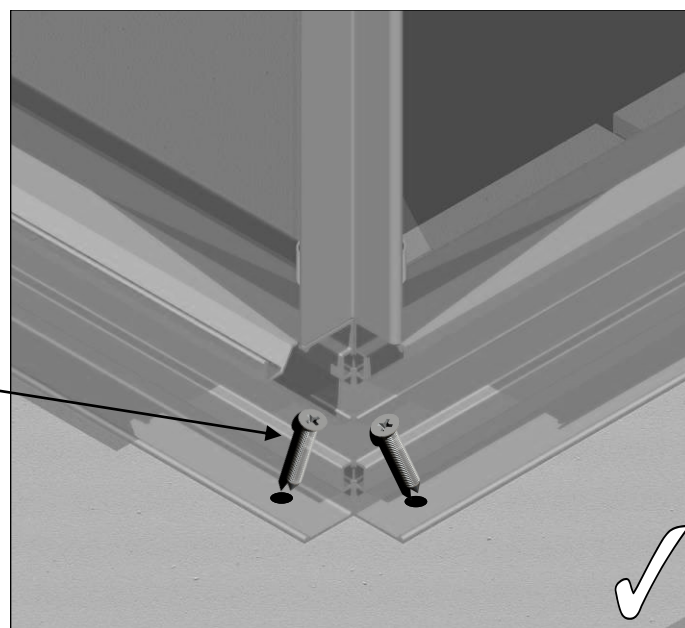

Verwijder de 2 moeren van de achterkant van de deur en maak de handgrepen vast (zie afbeelding). Herbevestig de moeren!

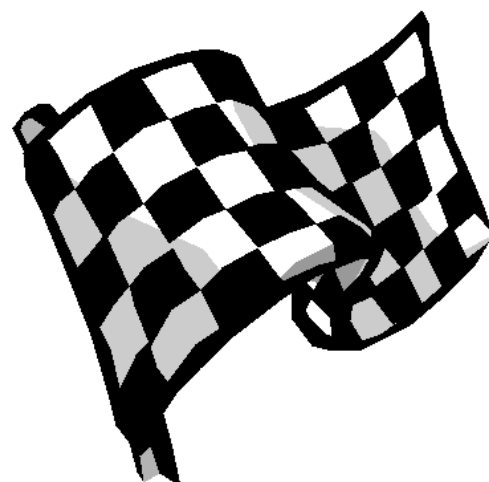

10

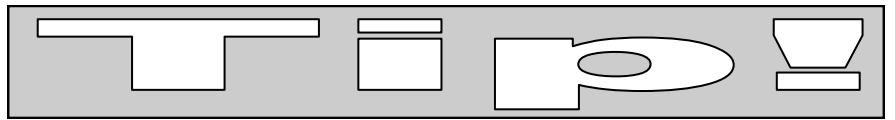

Nr 10 x 2"

Let op dat u door het funderingsprofiel en in de fundering moet schroeven onder een hoek van buiten de tuinkas.

Voorbeeld van het gebruik van siliconenkit.

Om de tuinkas waterdicht te maken is het een optie om binnen en buiten een transparante siliconenkit te gebruiken om gaatjes te vullen. Doe dit ook voor de bovenzijde van de ramen.

Voorbeeld van het gebruik van siliconenkit.
